

Download your EPT Desktop Application

'How to' Guide for Windows Users

The Desktop EPT is available for download here (<http://lbp.asn.au/EPT.zip>) as a ZIP file for Windows users - all versions from XP upwards are supported.

- Step 1: Save the ZIP file to your desktop (or somewhere convenient) and unzip it. It is about 30MB in size which should take from a few seconds to a couple of minutes to download, depending on the speed of your Internet.
- Step 2: Right-click on the file and select "Extract All..." in Windows Explorer.
- Step 3: Open the unzipped folder and run "EPT.exe" to launch the Desktop EPT.

No software installation is required. Everything is self-contained. Provided you have an internet connection, the Desktop EPT will update itself so you're always getting the latest software.
